so at your own risk).

User guide

A mix between Captain Falcon, Yatterman and hallucinatory mushroom's effects, it's him, the fabulous Captain Rainbow! Obviously bore from the ingenious minds of Skip, the creators of funny dream games like Chibi Robo and Giftpia, stuff for true cognoscenti.

Like in every other game by Skip, the main theme is other people' happiness. The main character is able to transform into a superhero by means of a special belt, but when he starts to become outdated, he decides to set sail for a mythical isle where dreams can -supposedly- come true.

In the beginning his only purpose is to regain his old fame, but day after day, after getting acquainted with the islanders, he will forget about his regrets and realize that the important thing of being a great hero is not the fame, but helping others selflessly.

Warnings: Since Captain Rainbow might be too awesome to bear, this game is not recommended for the faints of heart.
